Git/GitHub

Linux

LaTeX

Scientific Writing & Grant Proposals

Project Acquisition

Microsoft Office

WORK EXPERIENCE

Data Scientist

German Research Center for Artificial Intelligence (DFKI)

- Project acquisition and proposal writing for research funding and industry partnerships
- Sensor data preprocessing and ML pipeline development for classification and regression tasks
- Training and fine-tuning multimodal LLMs for medical video understanding and temporal event grounding
- Developing LLM pipelines for legal contract analysis via RAG and MCP, using privacy-focused solutions for secure document processing
- Developing pipelines for audio-video analysis using LLMs

July 2024 – now

Student Research Assistant

Medical Data Science Team, Univeristy of Lübeck

Internship followed by employment on the ScreenFM research project, funded by the German Federal Ministry of Education and Research (BMBF).

- Developed an automated screening system for detecting Fidgety Movements as part of the General Movement Assessment procedure.
- Developed and statistically evaluated ML classifiers for Fidgety Movement detection across RGB-D and IMU sensor modalities

Oct 2022 – Dec 2023

Registered Nurse

Various Hospitals, Schleswig-Holstein

- Patient care on medical and surgical intensive care units at UKSH Campus Lübeck
- Operated and monitored critical care medical devices including ventilators, infusion pumps, hemodynamic monitoring systems, and dialysis equipment
- Managed electronic health records and clinical documentation systems for ICU patient data

Jun 2016 – Apr 2024

EDUCATION

Master's Degree in Medical Computer Science

University of Lübeck

Title: Towards a Robust Detection of Fidgety Movements using RGBD and Inertial Measurment Unit data: Leveraging Deep Learning and Disentanglement Techniques

March 2024

Bachelor's Degree in Medical Computer Science

University of Lübeck

Title: Using a deep learning system for mobile ear recognition

November 2020
